The Department of Pediatrics and Pediatric Surgery at the University of Utah Hospital and Primary Children's Medical Center is an international leader in the medical care of children. The full range of pediatric services is available, from well-child care and supervision to diagnosis and management of children with general pediatric and subspecialty problems.
**ADOLESCENT MEDICINE**

801-581-3729

The Adolescent Medicine Service treats medical and psychosocial problems of youth ages 12 to 20 years. Adolescent Medicine Service is available in the form of direct care or telephone consultations. Complete evaluation may require several clinic visits or hospitalization. Areas of special interest include pregnant teens in the Teen Mother and Child Clinic; weight management, sexuality and reproductive health, substance use, behavioral problems and bio-psychosocial development in the General Adolescent Medicine Clinic; and hospitalized adolescents.

**ANESTHESIOLOGY**

University Hospital – 801-581-6393
Primary Children’s Medical Center – 801-588-3270

Pediatric Anesthesiology provides a full spectrum of inpatient and outpatient services including interdisciplinary pain management providing comprehensive evaluation and care to the child with chronic pain.

**CARDIOLOGY**

801-587-7544 or 801-588-2600

The Division of Pediatric Cardiology offers consultation and management of children with all forms of heart disease. Full cardiac catheterization facilities, two-dimensional Doppler and color flow echocardiography, Holter monitoring, magnetic resonance imaging, pacemaker follow-up, invasive and non-invasive electrophysiology, and other investigative and treatment techniques are all available. Cardiovascular surgery, including transplantation, also is available for all types of congenital and acquired heart disease.

EME RGENCY MEDICINE
801-587-7450

The Division of Pediatric Emergency Medicine provides emergent and urgent care to children of all ages. Division members see medical, surgical, and trauma patients within the Emergency Department of Primary Children's Medical Center, 24 hours per day, 365 days a year. The division also serves as control physician for emergency transport with LifeFlight air-medical service. The division also seeks to further the understanding of acute illness and injury in children through research, increased awareness, and level of care for childhood illness and injury through regional educational and advocacy efforts.

ENDOCRINOLOGY AND DIABETES
Utah Diabetes Center
801-587-3922

The Division of Endocrinology and Diabetes offers inpatient consultation and outpatient management of diabetes and endocrinology problems. We provide consultative and ongoing care for infants, children and adolescents with diabetes, growth abnormalities, thyroid disorders, abnormal pubertal development, gonadal dysfunction, adrenal disorders, pituitary dysfunction and problems of bone mineralization. The Diabetes Program uses a multidisciplinary team to provide ongoing medical care, individual and group education programs, and psychological support of children and families living with diabetes.

Outpatient clinics are held at the Utah Diabetes Center located at 615 Arapeen, Suite 100 in Research Park. Outreach diabetes clinics are scheduled on a regular basis in St. George, Price, Provo, and Ogden, Utah. Outreach endocrine clinics are held in Pocatello, Idaho, and in Provo and St. George, Utah.

GASTROENTEROLOGY
801-588-3370

The Division of Pediatric Gastroenterology offers inpatient and outpatient consultation and management for newborns through adolescents. Children may be referred for complex or common gastrointestinal problems, liver disease or growth problems. Liver transplantation
including reduced-size grafts and living-related donor is available for suitable candidates. Clinics offered at Primary Children’s Medical Center include Follow-up Nutrition (Dr. Dan Jackson), Dysphagia (Dr. Molly O'Gorman), Liver Clinic and Transplantation (Dr. Linda Book), and General Gastroenterology. Parent support groups are available for children and families with liver disease and inflammatory bowel disease. Management is available for patients needing enteral or parenteral nutritional support.

**Special procedures:** Gastrointestinal endoscopy, rectal and small bowel biopsy, sclerotherapy, percutaneous gastrostomy, liver biopsy, esophageal and rectal manometry, pH probe testing and breath hydrogen analysis.

**GENERAL PEDIATRICS**

801-581-2321

The Division of General Pediatrics provides a broad range of services for infants, children, adolescents, and families. It provides traditional well- and sick-patient care, as well as consultation on a variety of pediatric medical problems. Specialized services include behavioral and developmental pediatrics, child psychology, services for the educationally and mentally impaired, evaluation and care for foster and shelter care recipients, and a comprehensive medical and psychosocial program for the care of pregnant and parenting adolescents.

All services provided are sensitive to the particular needs of the child and his or her family, including socioeconomic and ethnic concerns. Please direct inquiries to any of the faculty members listed below.

HEMATOLOGY AND ONCOLOGY
801-588-2680

The Division of Pediatric Hematology and Oncology offers consultation and referral services for patients under 21 years of age with malignant neoplastic diseases or blood disorders. The division participates in the national Children’s Oncology Group and provides a comprehensive management program for pediatric oncology patients.

INPATIENT MEDICINE
801-588-3813

The Division of Pediatric Inpatient Medicine is a group of hospitalist physicians dedicated to caring for the hospitalized infant, child and adolescent. The hospitalists are board certified or board eligible in pediatrics, or in both internal medicine and pediatrics. The group cares primarily for patients admitted to PCMC who do not have primary care physicians or whose primary physicians do not have hospital privileges. The group also cares for medically complex patients referred by their primary care physicians.

MEDICAL GENETICS
801-581-8943

The Division of Medical Genetics provides genetic counseling and consultation for individuals of all ages with a wide range of genetic conditions including chromosomal disorders, single gene disorders and recognizable syndromes. The clinic, which is administered by the Department of Pediatrics, is held weekly at Primary Children's Medical Center. The clinic staff is a team of interdepartmental specialists in human genetics including medical geneticists, dysmorphologists, pediatricians, obstetricians, and genetic counselors. The division also provides inpatient consultations and participates in several outreach clinics and multidisciplinary teams. The neurofibromatosis clinic is held once a month at Primary Children's Medical Center, and is coordinated by the division.

**NEWBORN INTENSIVE CARE**

801-581-2745

The University Hospital offers services to sick term and preterm neonates in its 48-bed Newborn Intensive Care Unit. The unit is adjacent to labor and delivery, thus ideally suited to care for the infants born to high-risk mothers. Neonatologists work closely with obstetrical perinatologists. A maternal transport team is available 24 hours a day to transport high-risk mothers from throughout the Intermountain West, as is a neonatal transport service. The Newborn ICU staff is particularly well oriented towards the care of extremely low birth weight infants.

SURGERY
801-588-3350

The Division of Pediatric Surgery provides specialty expertise for common problems in children as well as pediatric specialty surgery.

Inguinal and Genital Surgery
Inguinal hernias and hydroceles, undescended testicle, circumcision, intersex reconstruction in females.

Lumps and Cysts
Lymph nodes, hemangioma, lymphangioma, thyroglossal and branchial cysts and sinuses.

Airway and Pulmonary Surgery, Chest Wall Reconstruction
Foreign body obstruction of airway, congenital tracheal stenosis, tracheomalacia, bronchogenic cyst, congenital emphysema, lung malformations, lung tumors, lung abscesses, empyema, pectus excavatum, pectus carinatum, Poland syndrome.

Gastrointestinal Surgery
Appendicitis, foreign body obstruction of esophagus, gastroesophageal reflux, pyloric stenosis, esophageal achalasia esophageal varices, intestinal obstructions, biliary atresia, choledochal cyst, abdominal wall hernias, gastrointestinal bleeding, anorectal disorders.

Pediatric Surgical Oncology
Wilms’ tumor of the kidney, neuroblastoma, rhabdomyosarcoma, liver tumors, pancreatic tumors, lymphoma, and chronic IV access.

Newborn Surgery
Esophageal atresia, tracheoesophageal fistula, necrotizing enterocolitis, congenital diaphragmatic hernia, gastrointestinal obstruction (atresia, stenosis, aganglionosis, meconium ileus), anorectal malformations, visceral ectopia (omphalocele, gastroschisis).

Surgical Endoscopy
Bronchoscopy, thoracoscopic surgery, esophagastroduodenoscopy, laparoscopic surgery, and colonoscopic surgery.

Trauma Management for Multiple System Injuries

Pediatric Liver Transplantation
Rebecka L. Meyers, M.D. Division Chief 801-588-3350
