

## ABOUT UNIVERSITY HEALTH CARE

University Health Care is the clinical care arm of The University of Utah Health Sciences. The physicians in The University of Utah Medical Group provide patient care in our hospitals and clinics and serve as faculty in the School of Medicine.

The collaboration between University Health Care and Health Sciences — the School of Medicine; colleges of Pharmacy, Nursing and Health; and the Spencer S. Eccles Health Sciences Library — ensures that patients who are referred to University Health Care physicians benefit from the collective expertise of our team.

The University of Utah Hospital, Neuropsychiatric Institute, Huntsman Cancer Hospital, Orthopaedic Center, and numerous specialty clinics serve referred patients in the Intermountain West and from around the country.

Each University of Utah Medical Group physician is licensed to practice medicine in the State of Utah; has successfully completed an accredited residency training program and is board-certified within five years from the date of hire.

## REFERRAL AND CONSULTATION
