

Advanced Trauma Care for Nurses

Benefits of the ATCN Course include an educational, team building, collaborative, and synchronized approach to trauma care as trauma nurses share didactic lectures with the physicians attendees of the ATLS Course. Doctors and nurses caring for trauma patients have the opportunity to share a common language and approach to trauma care. When the ATLS attendees break out for physician skill stations the ATCN nurses join small group trauma nursing skill stations.

The course includes didactic presentations on initial assessment, airway management and abdominal trauma, thoracic trauma, shock, head and spinal cord trauma, burns, extremity trauma, pediatric trauma, elderly trauma, trauma during pregnancy, and stabilization and transport. Coupled with the lectures are corresponding practical skill stations and moulage assessment.

2009 Courses
May 15th and 16th
November 13th and 14th

Enrollment is LIMITED! See inside for detail.
