

Half Marathon training plan, 12-weeks

A note on intensity: Don't just go all out! Speed will vary for different intensities for different people! And that's OK. Embrace where you are! Find your pace and be consistent. Times will improve with, well, time.

Mild Intensity: Shoot for about 30% of what you think your top speed will feel like. Think about your breathing, could you sing? You are at a mild intensity.

Moderate intensity: Once again, *moderate intensity*. Shoot for about 50% of what you think your top speed will feel like. Think about your breathing, could you talk in short sentences before needing to take a breath? If so, you're at a moderate intensity.

Vigorous intensity: Shoot for about 80% of what you think your top speed will feel like. Think about your breathing, could you sing? You are at a mild intensity

Mild = Walking

Moderate = Jogging

Vigorous = Running
