

Patient's Own Frame/Lenses Release Form

Although we use the utmost care when handling your frame(s) and/or lenses, there are many factors that go into why a frame may break, (i.e.: quality, age, frame material, etc...), or why lenses could become damaged. Occasionally, a frame will break in the process of adjusting it, or while manufacturing new lenses. Because we do not have control over these possible unforeseen factors, Moran cannot be held responsible for any breakage/damage to existing lenses and/or a PT's own frame. Moran is also not responsible for any loss of patients own property, whether it be in transit, or otherwise.

If you have read the above statement, understand it and wish to proceed, please fill out and sign below.

Thank you.
