Come participate in our summer 2019 5 to 8-year-old social skills group!

This summer, we will hold a 10-week adaptive behavior treatment group expanding on the skills outlined in the Superheroes Social Skills curriculum. Adaptive behaviors will include, but are not limited to: making eye contact, turn taking with peers, conversation skills, following directions, recognizing and reporting problems, perspective taking, and actively participating in group settings.

Each week, we will be at a different location in the community (schedule of locations will be given to families enrolled). Because of this, a caregiver is required to be present with the child at all times. Siblings are also welcome to attend; however, caregivers are fully responsible for monitoring and supervising their children.

**Who:** Ages 5-8 diagnosed with ASD

**Where:** Various locations in the community including parks, splash pads, the Clark Planetarium, and more!

**When:** Tuesdays, June 11th- August 13th

**Time:** 10:00AM-11:30AM

**Cost:** Covered by BCBS U of U insurance @ $5/group or $40/group for self-pay/out-of-network.

Please contact group coordinator Nicolette Goines by email at nicolette.goines@hsc.utah.edu if you have any questions or concerns.

Participants should have the following prerequisite skills. If new to our program, an evaluation will assess the following three behavioral areas to determine placement in the adaptive behavior treatment group:

1. Listener responding skills- demonstration of the ability to independently follow one-step directions.
2. Imitation skills- demonstration of the ability to watch and observe both the therapists and peers in a small group.
3. Small group social behaviors- independently sit in a small group for up to 3 minutes and attend to the social skill lessons.

Our team looks forward to working with your family!
