IT Updates

- *"I got this"* button gives dashboard users tip ownership. This new feature is important as it allows for communication between school contacts and ensures all tips are handled in a timely manner.
- *Scheduler* is a new feature allowing district leadership the ability to block out days (i.e. holiday breaks, summer vacation, etc.) for receiving non-emergent tips.

Highlights

SafeUT! Wow! A group of us used this app to support a friend. I was really impressed with the response time, we texted in, the person gave us some advice and resources. The craziest part was that administration and counselors contacted him the very next day, he was in counseling and getting help almost immediately. Seeing it firsthand help someone, it really made a difference. I'll never delete it now. Kids and adults need this.
